Update on Wynfield Residence Outbreak

On March 31 you were informed of a "outbreak" declaration by Public Health at the Wynfield residence, as a staff member who tested positive attended the location while in COVID positive state.

Mobile testing occurred on April 4, on April 6 it was learned that 2 of the three people served also tested positive. Their condition was stable.

Today one of the two condition worsened, and has been transported to an hospital ICU. It is considered that incubation will be difficult and that the person is in a very critical condition. The family has been summoned as difficult decisions may need to be made.

Please keep your thoughts and prayer for this individual and family, and as well for the other staff and clients affected.

All of the rest of the staff have been tested and are negative.

Regards,

JC Legault
